The Amazing race Australia used this site as a pitstop in the second series. Visitors can take advantage of stunning photo opportunities.

Humayun's Tomb

The mausoleum complex of Humayun, India's second Mughal Emperor, was commissioned by his widow in 1565 and was the first garden tomb to be built in India, taking seven years to complete. Humayun had travelled widely in Persia and Central Asia during his lifetime, and many of the architectural principles he brought back from these journeys were incorporated into the building at his wife's instructions. With its double domes, decorative inlaid marble and vast garden with pools connected by channels, this 16th Century building set the stage for the style that culminated in the Taj Mahal almost 100 years later.

The palace was named after the small town of Amer, where it is situated – only eleven kilometres from Jaipur. Perfectly picturesque, this 16th century hillside residence is well preserved, boasting grand pavilions and mirrored halls that open onto flourishing gardens and courtyards. Although the palace's main

construction started in 1592 by Maharaja Man Singh, it was added to over the years by successive rulers and continued to be occupied by them until Jaipur was built.

Photo stop at Hawa Mahal (Palace of Winds)

One of Jaipur's most recognised buildings, the Hawa Mahal (Palace of Winds) is known for its iconic façade. Small windows, decorated with intricate latticework create a honeycomb-like appearance. The original intention of the lattice was to allow the royal ladies to observe everyday life in the street below without being seen. The cooling effect, provided by the breeze passing through the small windows, gave the palace its name. Built in 1799 by Maharaja Sawai Pratap Singh, the unique construction was originally designed to look like the crown of Krishna. A panoramic view of Jaipur can be had from the top of the building.

Jaipur City Palace

City Palace forms one of the most famous tourist attractions and a major landmark in Jaipur. The beautiful palace was built by Maharaja Sawai Jai Singh during his reign. Among the various forts and palaces of Jaipur, City Palace stands apart, with its outstanding art and architecture.

Jantar Mantar

In 1734, the year of its completion, the Jai Singh Observatory was the last outpost of medieval science. From the outside, the eighteen fixed observational instruments look more like playground apparatus than sighting devices, but they were used to measure the position of the sun, stars and planets. Built by Jai Singh, the first Maharaja of Jaipur who founded the city in 1727, the observatory is one of a handful. Jai Singh, fulfilling a lifelong interest in mathematics and astronomy, built observatories in Delhi, Jaipur, Ujjain, Mathura and Benares. The Jaipur observatory is the largest and best preserved of these.
